DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-13, drawn to a gastroplasty band.

Group II, claim(s) 14-20, drawn to a method of fabricating a gastroplasty band.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature in both groups is the gastroplasty band with dorsal reinforcement and lateral walls made from the same elastomeric material, wherein the lateral walls have a hardness less than that of the dorsal reinforcement. This element cannot be a special technical feature because the element is shown in the prior art. US Patent 4,592,339 A teaches a gastroplasty band comprising dorsal reinforcement -25- and lateral walls -24- both made from the same Dacron mesh material (fig. 3 and col. 3, lines 5-7). The reference also teaches that the dorsal reinforcement portion is thicker than the lateral wall portion (col. 3, lines 32-35), therefore the dorsal reinforcement has a greater

Art Unit: 3735

hardness than the lateral walls to allow for directional expansion of the gastroplasty band such that the inner diameter becomes smaller, allowing it to compress the stomach.

3. The examiner has required restriction between product and process claims.

Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder.

All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double

Art Unit: 3735

patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
